

A man in a blue and white striped shirt is looking at a tablet. The background is dark with a network diagram overlay consisting of nodes and lines in shades of blue and pink.

A10

CORPORATE BACKGROUNDER

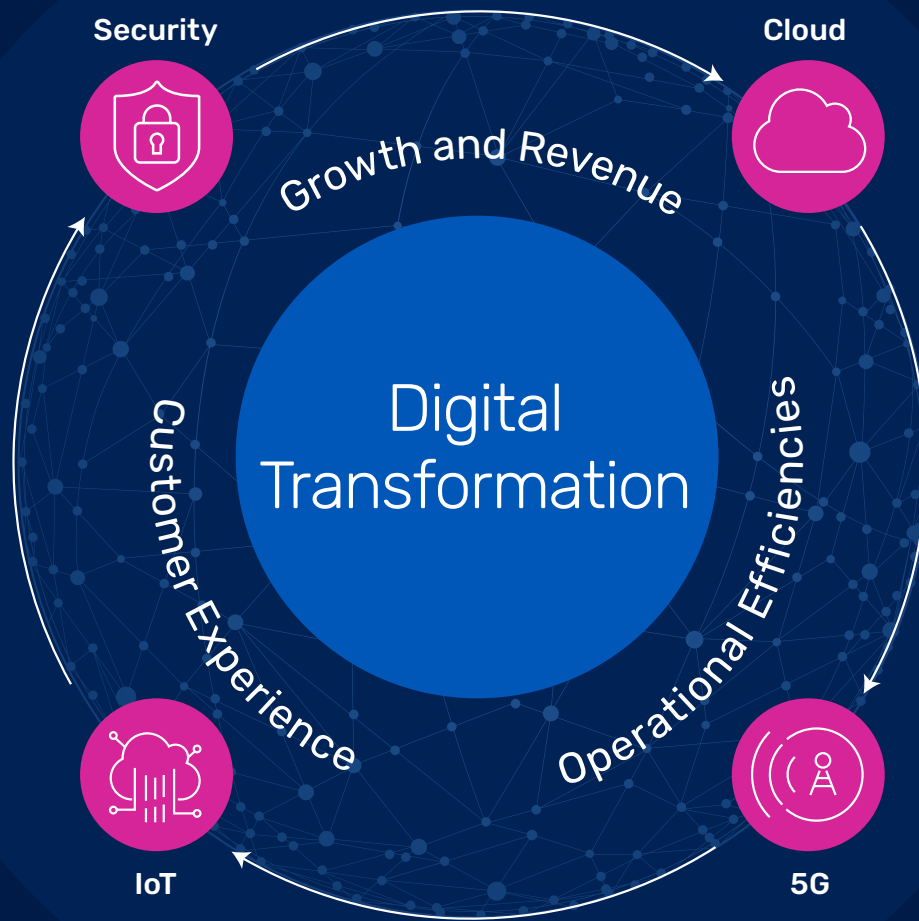

Enabling a Secure and Available Digital World

Introduction

Digital transformation is the key driver of technology today across the globe and across all industry verticals.

Long-standing challenges and new trends are helping to shape the path digital transformation takes for enterprises and service providers alike. The expanding challenges of realigning security and IT operations to encompass a complex multi-cloud world, IoT proliferation, the evolution of networks to cloud-native and preparing for 5G are all impacting the ability and speed at which businesses are transforming.

CIOs, CTOs and CISOs today are concerned about three key themes: how will they help drive growth and revenue; how will they ensure the best customer (and employee) experience and how will they drive further operational efficiencies.

A10 Mission

We enable service providers and enterprises to deliver business-critical applications that are secure, available and efficient for multi-cloud transformation and 5G readiness.

Innovative Secure Application Services for Better Business Outcomes

A10 Networks® provides secure, scalable application services for on-premises, cloud, and edge-cloud environments. We deliver better business outcomes that support investment protection, new business models, and help future-proof infrastructures.

Personnel: 779 employees serving customers in 117 countries

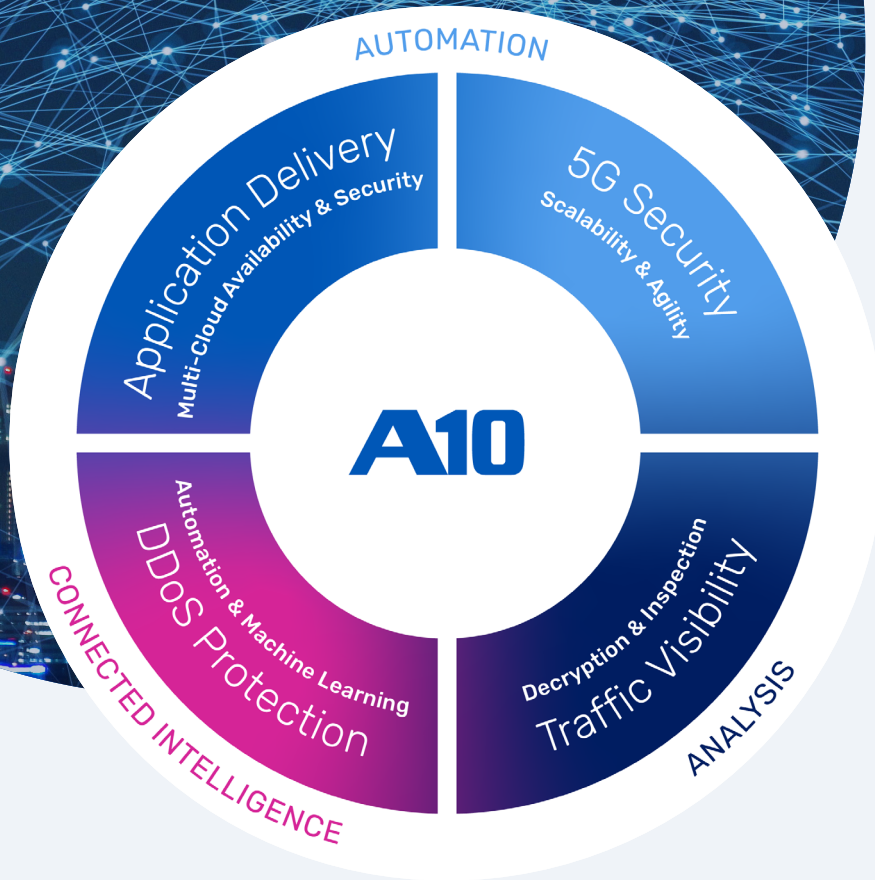

Business: Hardware and software-based revenue model

Customers: 7,700+ customers

Partners: Affinity Partner program – global traction with deep relationships

Revenue: Profitable, no debt

Expansion: New and expanded OEM relationships

✓ Polynimbus Secure Application Services
Thunder® Application Delivery Controller (ADC)

Our advanced server load balancing solutions will help you meet availability demands, ensure security, and enhance user experience in today's multi-cloud application-centric world.

✓ Orion 5G Security
Thunder Convergent Firewall (CFW)

With the Orion 5G Security Suite, we help mobile operators and service providers future-proof their networks with agile and consolidated solutions, which result in improved security, hyperscale delivery, higher reliability, and lower TCO.

✓ Automated DDoS Defense
Thunder Threat Protection System (TPS)

With scalable and automated DDoS protection powered by AI and advanced machine learning we help you combat the growing problem of multi-vector and IoT DDoS attacks to avoid business downtime, lost revenue, and damaged reputation.

✓ Traffic Visibility
Thunder SSL Insight® (SSLi®)

We help provide a foundation for zero trust edge defense, ensuring your network is protected from SSL/TLS encrypted cyber attacks by enabling decrypted traffic inspection via your enterprise perimeter security infrastructure.

✓ Service Analytics and Management
A10 Harmony® Controller

We deliver centralized management and granular actionable analytics for Secure Application Services™ across on-premises data centers and public, private, and hybrid cloud.

About A10 Networks

A10 Networks (NYSE: ATEN) provides secure application services for on-premises, multi-cloud and edge-cloud environments at hyperscale.

Our mission is to enable service providers and enterprises to deliver business-critical applications that are secure, available and efficient for multi-cloud transformation and 5G readiness. We deliver better business outcomes that support investment protection, new business models and help future-proof infrastructures, empowering our customers to provide the most secure and available digital experience.

Founded in 2004, A10 Networks is based in San Jose, California and serves customers globally.
